

## **HISTORY OF THE SERIES**

The Southeast Super Stocks Series, LLC was formed during the winter of 2014.

The Southeast Super Stocks Series was developed to have an affordable touring series that local Drivers could run. The Series has incorporated a one tire rule which cut down on the cost. We do travel, but in most cases, you can be home in just a few hours. With the schedule that has been developed, drivers still have time for quality Family time and vacations. This series also provides a place for the up and coming young drivers to start, allowing them to fine tune their driving skills before moving into the next levels of racing.

The Southeast Super Stocks Series 2015 Inaugural season had 32 total entries for the season. In the 12 race season, the Series averaged 10 cars per race event. Even though, this seems to be a small car count, this Series put on some of the best racing. We expect this Series to have a bigger car count in the 2016 season and make the racing for the fans even better.

The Southeast Super Trucks Series is getting ready to start it's fifth season of racing. We are very excited about the continued growth of the Southeast Super Stock Series, along with the fan pleasing Carolina Vintage cars adding new cars weekly.

The staff of the Southeast Super Trucks/Stocks Series is very appreciative to the Drivers, Crews, Families and Fans that has helped to make this Series a success. We look forward to seeing you in the 2016 season and expect the racing to be even better than ever.
